Unleashing the Power of Digital Pathology for Enhanced Education

Microscope has been the workhorse for pathology education, until now. There are many things that a pathologist could never do with a microscope - like remote lecturing, or simultaneous viewing of multiple slides, just to name a few. With the advent of whole-slide imaging, pathology can now be done in many ways unimaginable before. Dedicated to enhancing pathology education, aetherWeb is a web-based platform not only to mitigate barriers of adoption of digital pathology but also to amplify the content curated by digital slides. aetherWeb is transforming pathology education with its design to facilitate communication and collaboration between users worldwide.

Access and Collaborate Anytime, Anywhere

- Web-based platform enabling users to access and collaborate anytime, anywhere
- Simultaneous viewing function works even better than multi-headed microscope to amplify your expertise with location independence
- Accelerate remote collaboration with productive tools featuring ergonomic human-computer interaction
- Vendor neutral archive solution currently supports .ndpi (Hamamatsu), .mrxs (3DHISTECH), and .svs (Leica Aperio) file formats

Manage and Share Slides Intuitively

- Establish personal and institutional digital slide collections on a daily basis
- Access and share slides within and across your institutions
- Enhancing patient privacy with default de-identification function

Transform Learning and Teaching Experiences with Digital Pathology

- Designed around educational scenarios, providing dedicated interface for both Host and Participants
- Prepare consistent and reusable teaching materials easily
- Provide course management tools, including course information, group members, and privacy settings
- Offer Course and Quiz mode for advanced educational experiences

Access to Expanding Pathology Knowledgebase

- Access to high-quality slide collections curated by renowned domain experts around the world (such as the Spinocerebellar ataxias collections from Initiative for Columbia Ataxia and Tremor)
- Promote your organization by securely sharing valuable slide collections with configurable access rights
